

FOUNDATION

Multis Multum Foundation was created on 15 November 1999. In March 2000 it was incorporated at the Regional Court for the Capital City of Warsaw and registered in the Foundation Registry under position 5919. The Foundation's statutory goals include:

- initiating, supporting and carrying out various activities in the fields of education, culture, physical culture and sport that would give children and youth opportunities for better personal development;
- initiating and carrying out various activities connected with health protection and welfare, as well as professional and social rehabilitation of the disabled, especially children and youth;
- initiating and carrying out various activities in connection with protection of the environment and cultural heritage,
- carrying out charity activities.

To reach the goals related to protection of health, on 25 July 2000, the Foundation established the Scientific Committee.

Permanent members of the Scientific Committee include:

- Prof. Artur Dziak – Chairman,
- Waldemar Sielski – Vice Chairman,
- Dr hab. Bogdan Cieszek, M.D. – Secretary,

Physicians, specialists in orthopaedics:

- Dr Grzegorz Adamczyk,
- Dr Robert Śmigielski.

Members of the Scientific Committee for the current term include:

- Prof. Mirosław Ząbek,
- Prof. Andrzej Wit,
- Prof. Waldemar Olszewski,
- Prof. Marek Niezgódka,
- Prof. Wiesław Jakubowski.

FOUNDATION

One of the aims of the Scientific Committee is carrying out activities related to improvement of health protection and welfare, improvement of professional and social rehabilitation, including support for relevant branches of science and education.

In keeping with this goal, on 17 February 2001, the Committee organised the first scientific conference. The conference was devoted to pathology and treatment of articular cartilage. Almost 200 physicians and physiotherapists from all over Poland took part in it.

The Committee plans to organise a whole series of Scientific Conferences with the aim to widen knowledge and experience in selected areas of medicine. The Foundation will invite renowned specialist from the world over to participate in these conferences.

Multis Multum Foundation and the Scientific Committee prepare and publish *Acta Clinica* Quarterly. Its first issue includes papers on treatment of articular cartilage. The Committee plans that the subsequent issues will present the most interesting achievements and research carried out in the field of medicine.

Another goal of the Foundation is to help the most talented youth. To this end, the Foundation supports activities helping children to broaden their knowledge, acquire new abilities and exchange experience in Poland and abroad. Multis Multum Foundation established co-operation with Irena Szewińska's Vita Activa Foundation and helps in organisation of running events for children and youth.

Also, the Foundation helped to publish two books. These include the first volume of poems by Anna Misić, a young poet, called „Somewhere between You and Me” and Prof. Wojciech Zabłocki's „Polish Martial Arts”.

The Foundation also carries out charity activities.

PRESIDENT OF THE MANAGEMENT BOARD
Anna Karpińska
